Personal Project

Music Streaming Platform: (February 2023 - Now)

- **Languages:** HTML, CSS, Javascript
- **Libraries/Framework:** ReactJS, NodeJS, ExpressJS, Axios, Spotify-web-api-node, Nodemon, Cors, Body-Parsers
- **Other:** Responsive, UI/UX
- **Description:** This is a project I'm still working on. In this project, I created a music streaming platform website. I called the API from Spotify and users only need to have Spotify accounts to be able to log in. Once logged in, users can search for their any song they want and press it to listen, they can also create a playlist and save their favorite songs without spending too much time searching. In addition, the website also recommends current trending songs and trending singers for users to have the best experience while they spending time to listen to music

Hotel Website: (November 2022 - January 2023)

- **Languages:** HTML, CSS, Javascript
- **Other:** Responsive, UI/UX
- **Description:** This is a project I designed and upgraded for my friend's hotel website. I used HTML and CSS to designed and upgraded the user interface to give them the good booking experience. As for Javascript, I used it to do small features such as hiding/showing menus when customers use it via mobile/tablets. In addition, I have also made the website responsive for all devices so that users can access it from anywhere

"Don't touch your face" App: (September 2022 - November 2022)

- **Languages:** HTML, CSS, Javascript
- **Libraries/Framework:** ReactJS, TensorFlow.JS, NodeJS
- **Other:** UI/UX
- **Description:** In the context of the current Covid-19 epidemic, it is very important to raise awareness of disease prevention. This is an app that
